

# Airline Delay Analysis

CIS 4560 Professor Jongwook Woo

By

Cristian, DJ, Sarah, Monica, Kevin, Adrian

# Why we chose this topic?

If you have ever taken a flight anywhere, chances are you have experienced your plane being delayed at take-off. There could have been an issue with weather, the airline, security, or the aircraft arriving late. But if you were ever curious to know what airlines, which airports, and for how long you or any other plane was delayed for, you will find that information here.

# Agenda

- ❖ Data Source & Github
- ❖ Workflow Map – Data Analysis
- ❖ Types of Delays
  - ❖ Aircraft
  - ❖ Airline
  - ❖ Security
  - ❖ Weather
- ❖ Cancellations
- ❖ Flight Patterns
- ❖ Total Minutes
- ❖ Conclusion

## Airline Legend

Code	Airline
9E	Endeavor Air Inc.
AA	American Airlines
AS	Alaska Airlines
B6	JetBlue Airways
CO	Continental Airlines
DL	Delta Airlines
EV	ExpressJet Airlines
F9	Frontier Airlines
FL	Air Tran
G4	Allegiant Air
HA	Hawaiian Airlines
MQ	American Eagle Airlines
NK	Spirit Airlines
NW	Northwest Airlines
OH	PSA Airlines
OO	Skywest Airlines
UA	United Airlines
US	US Airways
WN	Southwest Airlines
XE	JetsuiteX
YV	Mesa Airlines
YX	Republic Airways
VX	Virgin America

SUM(Aircraft Delays)

43,358

8,484,610

# Aircraft Delay Analysis

- The heat map allows the viewer to see the most aircraft delays that are a direct correlation to airline delays in a given year by any airline
- Hawaiian Airlines experienced the least amount of aircraft delays in 2009 with just over 43k, while also having the least amount on average over the 9-year span
- Southwest Airlines experienced the most aircraft delays in 2014 with a little bit over 8.4 million

# Airline Delays

# Airline Delays Analysis

- This portion of the analysis is secluded to the airline causing their own delays
- From the data, 2018 had the most airline induced delays with over 28 million, which is over 21% more than the next closest year in 2014 with just over 22 million delays
- Of the top 10 rated airlines, Southwest Airlines experienced the airline induced delays over that 9-year span every single year

# Security Delays by Minute

- Security Delays are the least impactful of all the major delay types
  - Showing significantly less total minutes delay overall versus the others
- WN airline leading in security delays from 2009-2018.
- Peaking 40,498 delays in 2018.
- American Airlines comes in second
- Spiked in 2019 over shutdown protests over withheld pay in numerous airlines

# Security Totals

## - Total count

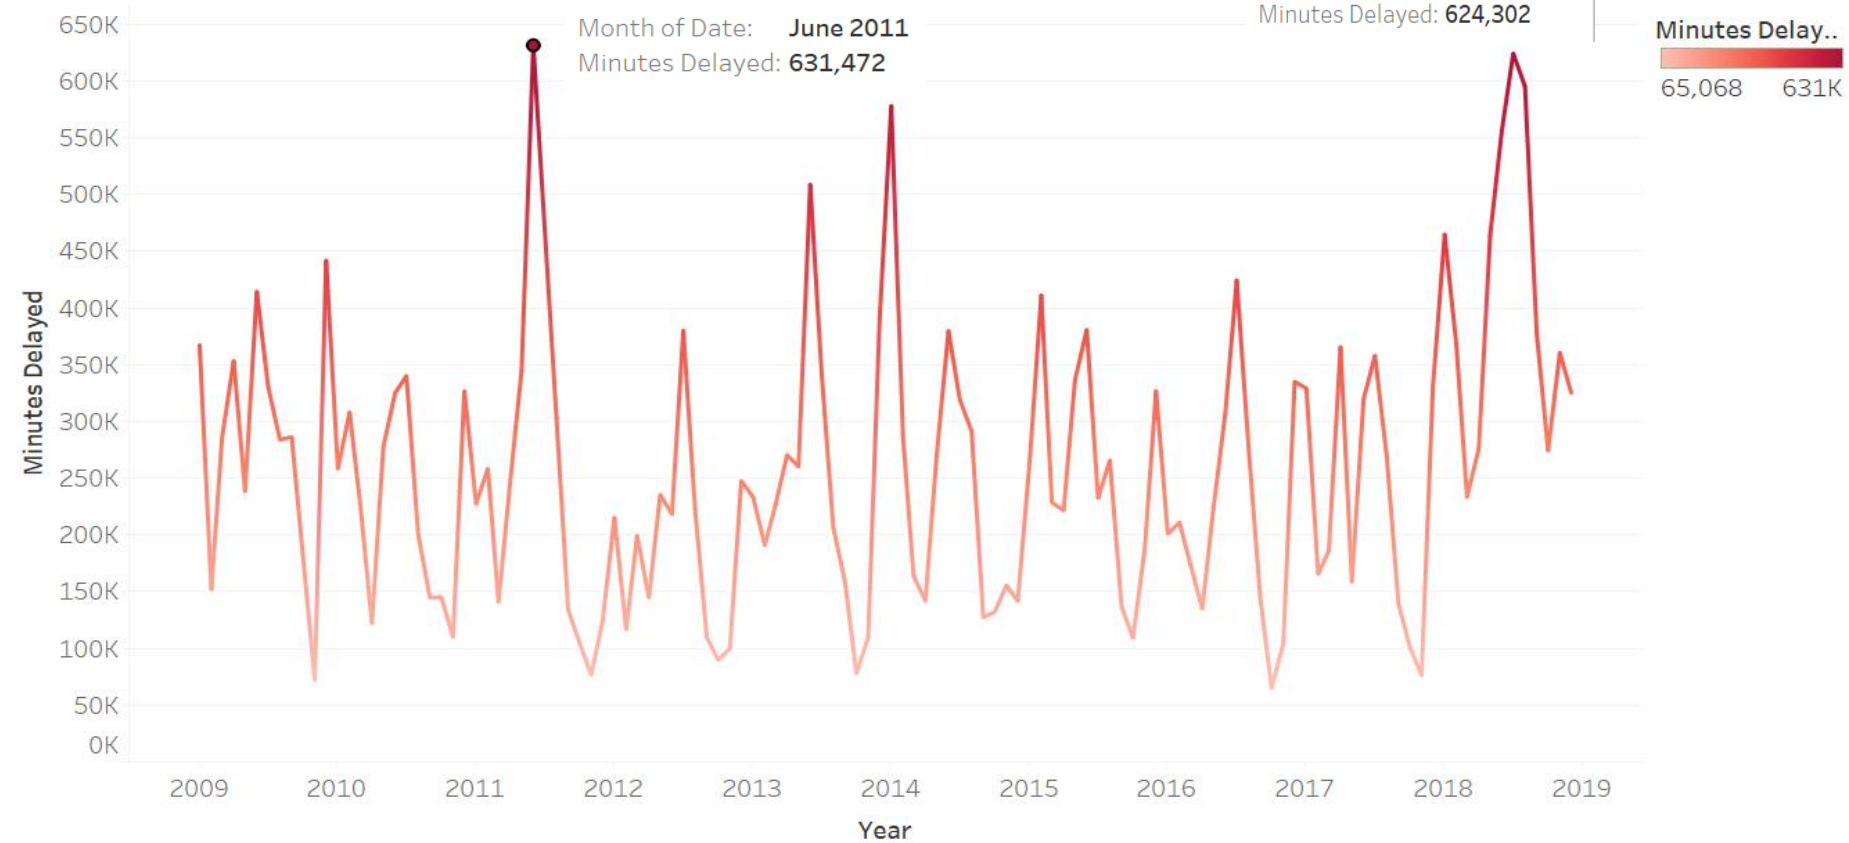

-Total counts of security delays

-30% are by Southwest Airlines, but still maintain good customer satisfaction

-These are caused by increased security measures, technical issues, and as staffing shortages

# Weather Delay

Year Over Year Weather Delays

# Weather Delay Analysis

## June 2011

**Tornadoes:** Above-average tornadoes impacted major hubs in the Midwest and Southeast.

**Heat Waves:** Affected air traffic through operational and safety constraints.

**Thunderstorms:** Caused frequent shutdowns and delays at key airports.

## July 2018

**Heat Waves:** Record-breaking temperatures impacted operations and maintenance.

**Wildfires:** Reduced visibility and air quality, disrupting flights particularly in the western U.S.

**Thunderstorms & Severe Weather:** Led to significant delays in busy airspace.

# Cancellations Per Airline

## Cancellations Per Airline

Top 5

# Cancellations

- In 2014, there was a notable surge in flight cancellations across various airlines and airports.
  - **We can correlate this to a Weather Events**
- In 2014, a severe weather phenomenon known as the Polar Vortex swept across the United States.
  - In 2011, Passengers also faced travel disruptions in due to Hurricane Irene and it affecting various regions along the East Coast

# Cancellations Per Airport

# Cancellations Per Airport

Top 5

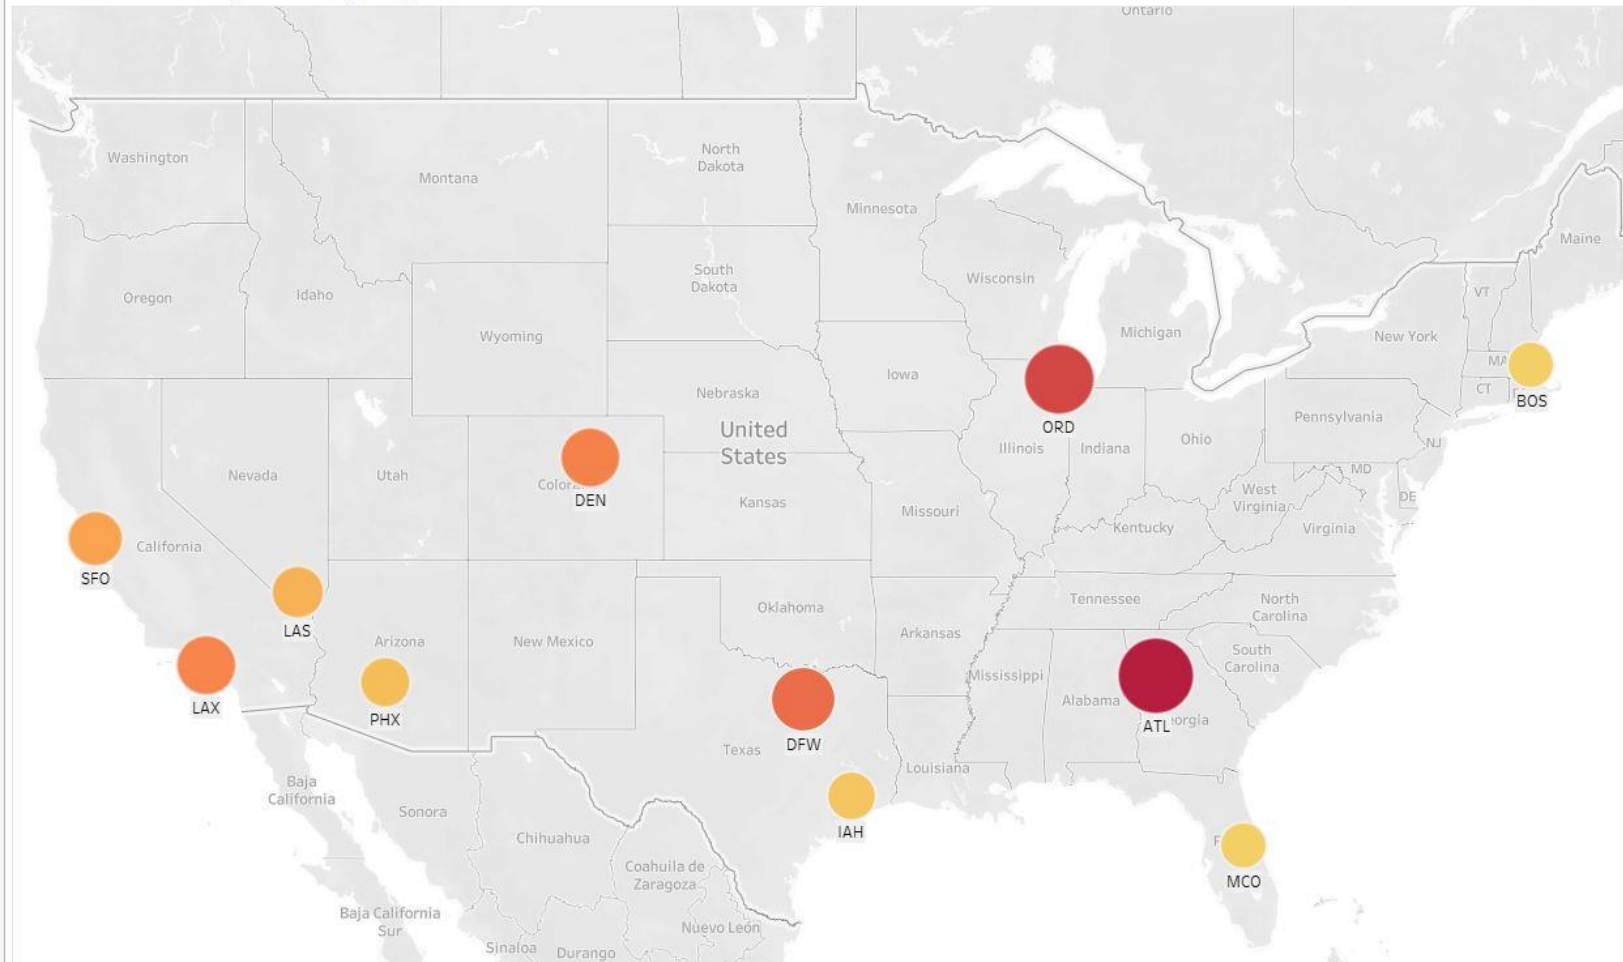

# Airport Correlations

- Factors such as these weather events and operational challenges can cause air traffic congestion.
- The data shows that these conditions disrupted air travel operations, leading to widespread flight cancellations and delays.

# Flight Patterns

## Airports with the Heaviest Traffic During the Spring

Most Traveled Airports in Spring from 2009-2018

In 2023 Los Angeles, San Francisco, Denver, Dallas, and O'Hare International Airports were included in lists of the top 10 worst airports to travel through in the United States. Despite being the busiest airport in the world, the Atlanta International Airport has consistently been ranked as one of the best airports to pass through.

### Total Minutes Delayed - Airline

# Total Minutes Delayed by Airline per Year

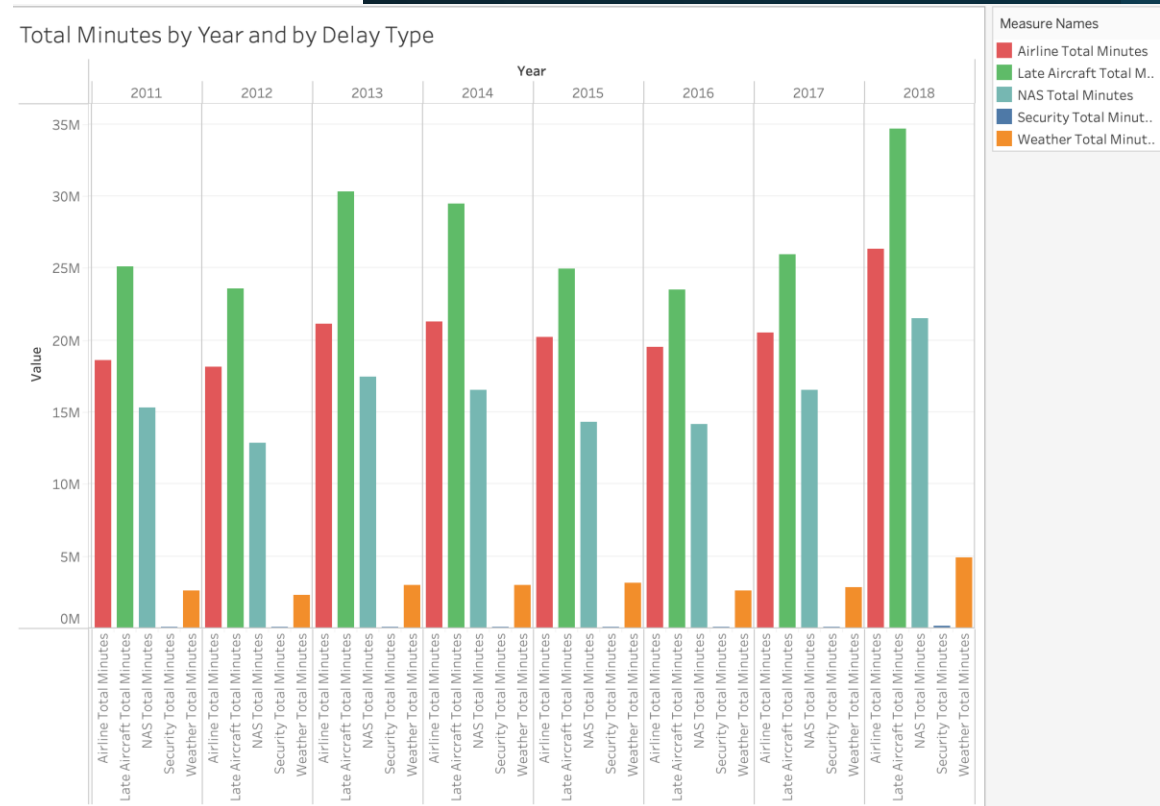

- Southwest is the airline with the most minutes delayed over the years from 2009-2018
- Of the major airlines, American Airlines and Delta Airlines rank in the top 3 of total minutes delayed.
  - Other factors that can attribute to this is the sheer number of flights each airline flies each year
- If arriving on time, or just leaving at your scheduled time is important, you may want to avoid the top 5 airlines listed on the tree map

# Total Minutes Delayed by Type

- From 2011-2018, late aircrafts dominated the total minutes delayed per year by a significant margin.
- In large part because other delays can have a major impact on aircrafts being late.
- If an aircraft is delayed at take off for any reason, it is safe to assume that there is a possibility that the next flight that plan must make after landing at its destination will be delayed
- We can also see that security delays are seldom the reason why a flight is delayed, with totals never surpassing even the 500k minutes mark.

# Conclusion

- ✓ - There are too many flights happening every day in the world, let alone every year
- ✓ - In 2018, for Late Aircraft delays, we clocked in over 64 years of delay time
  - ✓ Multiple flights happening at the same time globally
- ✓ Airlines cause the most delays of the what we have explored today
  - ✓ As we have heard in recent news, it is due to negligence by the Airlines and the manufacturer's in maintaining their aircrafts
